### RESTRICTION

1. Applicant's amendment filed on 7/20/01 has been entered. Claims 1-24 have been canceled. Claims 25-49 have been entered, Claims 25-49 are pending in the application.

2. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 25, 27, 29, 31, 32, 35, 38, 43-44 and 46 drawn to polypeptide, fusion protein, vaccine and a method of inducing immune response. Further restriction to one SEQ.ID.NO required (see paragraph # 3).

Group II, claims 26, 28, 30, 33-34, 36-37, 39-42 drawn to DNA, vector and host cell and process of expressing polynucleotide. Further restriction to one SEQ.ID.NO required (see para # 3).

Group III, claims 45 and 49 drawn to an antibody and a therapeutic composition. Further restriction to one SEQ.ID.NO required (see paragraph # 3).

Group IV, claim 47 drawn to a method for diagnosing Neisseria infection using peptide or antibody. Further restriction to one SEQ.ID.NO required (see paragraph # 3).

Group V, claim 48 drawn to a method for inducing immune response using polynucleotide. Further restriction to one SEQ.ID.NO required (see paragraph # 3).

The inventions listed as Groups I-V do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Group I is directed to a polypeptide and a method of use. The special technical feature is the polypeptide, which is made up of amino acids. Groups II-III are drawn to structurally different products such as nucleic acids and antibodies which do not require each other for their practice and do not share the same or a corresponding technical feature. Group II that is drawn to nucleic acid is the first product and product of use. The Group IV-V inventions are drawn to methods having different goals, method steps and starting materials, which do not require each other for their practice and do not share the same or a corresponding technical feature. Note that PCT Rule 13.2 does not provide for multiple products or methods within a single application. Since the special technical feature of the Group I invention is not present in the Group II-V claims, and the special technical features of the Group II-V inventions are not present in the Group I claims, unity of invention is lacking.

### **DISTINCT INVENTIONS**

3. For each group of inventions I-V above, restriction to one of the following SEQ.ID.NO is also required under 35 U.S.C. 121 and 372. Therefore, election is required of one of inventions I - V and one of SEQ ID NO: 1 - 4.

Inventions SEQ ID NO: 1 - SEQ ID NO: 4 are not so linked as to under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Art Unit: 1645

SEQ.ID.Nos 1-4 represent structurally different polypeptides and the polynucleotides encoding them. Therefore, where structural identity is required, such as for hybridization or expression, the different sequences have different effects. Thus, each sequence is unique and patentably distinct since each sequence has a different structure with specific amino acid or nucleic acid and is identified by a specific SEQ.ID.NO and thus lack the same or corresponding special technical features. Applicant is required under Restriction is required under 35 U.S.C. 121 and 372 to elect a single disclosed SEQ.ID.NO from any group elected.

4. Applicant is required, in reply to this action, to elect a group and one sequence and identify the SEQ.ID.NO to which the claims shall be restricted. The reply must also identify the claims readable on the elected invention, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Padmavathi v Baskar whose telephone number is (703) 308-8886. The examiner can normally be reached on M-F (6:30A.M-4: 00 P.M.) First Friday off.
